

Enrichment

Our Sixth Form Enrichment Programme is bespoke and has the student at the very heart of what Park House has to offer. We encourage students to have seize the opportunities available and encourage sixth formers to develop their interests, go beyond their courses, work independently and - importantly - to love learning.

The PH6 Enrichment Programme is structured around our conviction that students should be responsible, kind and work hard and that learning should be undertaken for its own sake. At the same time, the Enrichment Programme is by no means just idealistic. We want our students to be ready for university, apprenticeships or the world of work. Focusing on life after PH6 and to have developed the skills of independent learning that are so vital in Higher Education and beyond. The Enrichment Programme helps adds value to students learning and prepares them for life after school. It gives us the opportunity to engage our sixth formers in the wider community and teach important life-skills.
